Rupon Sarkar

Web Application Engineer with hands-on experience in building scalable, high-performance web applications using React, Node.js, and Laravel. Skilled in full-stack development, API integration, and modern UI/UX implementation. Strong understanding of RESTful architecture, MVC frameworks, and cloud-based deployment. Adept at collaborating with cross-functional teams to deliver efficient and user-centric solutions. Passionate about clean code and continuous learning.

SKILLS

React, NodeJs, Typescript, Express, MySql, MongoDB, NextJs, Angular, VueJs, Laravel, PHP, Socket,, Git

EXPERIENCE

Acquire.io, California (Remote)— *Web Application Engineer*

May 2024 - PRESENT

- Contributed to modular, scalable front-end architecture with reusable components for live chat, ticketing, and engagement tools.
- Created RESTful APIs in Node.js to handle agent actions, data retrieval, and system analytics.
- Optimized performance for high-volume agent environments, ensuring smooth multi-channel communication and fast response times.
- Built dynamic, responsive, and intuitive agent dashboard UIs using React.js, enabling agents to manage leads, conversations, and customer interactions efficiently.
- Works on Socket.IO for real-time messaging and presence tracking between agents and users.
- Provided continuous support, bug fixes, and enhancements.

Zakti Digital Services, Guwahati, Assam — *Fullstack Developer*

June 2022 - May 2024

- Developed and maintained custom web applications for multiple clients across domains including hospital, school, and event management, ensuring scalable and modular codebases.
- Collaborated with cross-functional teams to deliver client-specific solutions, customizing dashboards, role-based access, and workflow automations based on sector needs.
- Provided continuous support, bug fixes, and enhancements in a fast-paced environment managing multiple concurrent projects.

Skaplink Technologies, Guwahati, Assam — *Software Developer*

Sept 2021 - Jun 2022

- Contributed to the development of HRMS (Human Resource Management System) features including employee onboarding, attendance tracking, payroll modules, and leave management workflows.
- Designed and implemented bus schedule management systems, supporting real-time tracking, route planning, and automated notifications for both admins and users.
- Worked in a fast-paced environment, managing multiple simultaneous client projects while ensuring timely delivery and client satisfaction.
